What is the Area Envirothon

The Area Envirothon is an environmental competition for high school teams to challenge their environmental knowledge and problem solving skills. Five learning stations are presented by natural resource professionals in the fields of forestry, soils, water quality, wildlife, and a current environmental issue. In addition, students will be asked to make a 10-minute oral presentation on the current event issue at a sixth station.

The contest takes place in an outdoor setting. Teams are composed of five students from the same school or organization. At each station, teams are given a short presentation and students must then answer 20 questions specific to that station.

The top three to four teams, depending on the number of registered teams, will proceed to the State Envirothon competition, which will be held in southeastern Minnesota this year.

Who is invited to participate?

Any student teams, grades 9-12, from high schools, home schools, or organizations (4-H, Scouts, etc.) in Area III. Area III includes Cook, Lake, St. Louis, Aitkin, Carlton, Kanabec, Mille Lacs, and Pine counties.
