**Initiative: 2010 Knife River CWF Project Development**

Year: 2010

Start Date: 07/01/2010

Initiative Type: Project Development

Completion Date:

Description

Coordinate with the Knife River Stewardship Committee to select project sites, select BMPs, obtain permits, and review designs. Communicate with landowners, send newsletters or other direct mailings.

Actual Results

August 1, 2010 report: One newsletter has been sent. Work on project site selection has begun.

Feb 1, 2011 report:

Landowner contact: Tree Planting: We held a meeting at the Knife River Rec. Ctr on the evening of October 28, 2010 for KR Land owners in order to solicit participation for the activities outlined in the grant. The meeting was advertised through a post card mailing inviting landowners to attend the meeting or to call for more information. Staff from MN Environmental Partnership assisted with the meeting. MEP has funding to do community organizing in the watershed so this partnership will likely continue. We provided a powerpoint presentation about the available funding and about the TMDL in general and had the TMDL plan and a large format map available for people to look at. We followed up with landowners who expressed interest in participating with site visits, which included further information regarding KR restoration activities. We also provided information on the availability of funding for KR restoration activities on private lands on our website and facebook page. A landowner mailing of about 100 letters was sent out in November to large-acreage riparian landowners explaining our efforts under this grant and seeking participation in riparian tree planting. As of now we have secured permission from 6 private landowners to plant trees on their property and we expect to identify more. Ditch Checks (Roadside Stormwater Detention): on October 20, 2010, SWCD and TSA staff met with representatives from St. Louis County to identify possible locations for ditch checks. Exact locations are still being identified but the County staff are very willing to cooperate in this effort. Stormwater BMP Implementation: We have clarified this task with approval from BWSR. Please see Wittlief Bank Stab. Project information in Elink. Stewardship Committee: The Stewardship Committee met on Dec 14, 2010 to discuss possible sites for the grant activities.
