Order Early For Full Selection

AFTER MARCH 1st, please check our website or call for availability before ordering. Even if you

order before April 13th, the SWCD cannot guarantee all stock will still be available. We do our best to anticipate demand for trees, however we will run out of some as the sale goes on.

Mark your calendar NOW!

*Don't forget your trees! We'll send a reminder (by email only) closer to the pickup dates, but if you haven't received an email by May 8th, check our website or give us a call. **Your emailed sales receipt will have more information about pickup locations.***

Plants are perishable – make your planting plans now

Pick up your order promptly, and get them in the ground within days. The SWCD is not responsible for the condition of trees or shrubs after pickup, due to their perishable nature.

Trees & shrubs offered are conservation-grade, bare-root stock. Tall trees and evergreens should not be planted near power lines, but all shrubs and small trees are OK near lines.

The SWCD does not guarantee survival and/or replacement of trees. Size is subject to change without notice. Refunds will only be made if stock is exhausted. **Failure to pick up your order during the allotted times will result in the loss of payment.**

Orders are due April 13, 2018

2018 Native Tree & Shrub Descriptions*

Species	Scientific Name	Mature Size (height/width)	Light Needs	More about growth rate and soil preferences
Ash, Mountain	<i>Sorbus americana</i>	20' / 20'	Any	Slow growing, prefers rich soils, tolerates others. Red fruit stays through winter.
Birch, Paper	<i>Betula papyrifera</i>	50-70' / 40'	Full	Rapid growth, prefers well-drained sandy loam.
Birch, River	<i>Betula nigra</i>	40-60' / 24'	Full	Moderately fast growing. Prefers wet sites, tolerant of flooding.
Cedar, White	<i>Thuja occidentalis</i>	40-50' / 15'	Any	Slow to moderate growth rate, plant in clay loams, sandy loams, lakeshores.
Cherry, Black +	<i>Prunus serotina</i>	50-75' / 25'	Full	Well-drained sandy or loam, hardwood, black fruit matures late in season.
Cherry, Choke +	<i>Prunus virginiana</i>	25' / 25'	Part	Fast growing, loamy well drained soil, red-purple to blackish fruit.
Cherry, Pin +	<i>Prunus pensylvanica</i>	30' / 5'	Full	Plant in full sun, could produce in 2 years, small white flowers.
Cherry, Sand +	<i>Prunus besseyi</i>	3-6' / 3-6'	Full	Winter hardy. Loamy, dry, sandy, or rocky soils. Withstands drought.
Chokeberry, Black	<i>Aronia melanocarpa</i>	3-6' / 3-6'	Full	Red autumn leaves, white flowers, lasting fruit, adapts to most soils.
Cranberry, Highbush +	<i>Viburnum trilobum</i>	12' / 12'	Part	Prefers moist well-drained soil, but not particular about type. Easy transplanting.
Dogwood, Gray	<i>Cornus racemosa</i>	6' / 12'	Part	Not fussy about soil type, but prefers well drained. Has white flower.
Dogwood, Red-Osier	<i>Cornus sericia</i>	11' / 12'	Any	Fast growing, prefers wet sites, red stems. Winter color, white flowers & fruit.
Elderberry +	<i>Sambucus canadensis</i>	9' / 9'	Part	Prefers loamy moist soil, white flowers, purplish black clusters of fruit.
Fir, Balsam	<i>Abies balsamea</i>	40-60'/20-35'	Shade	Fast growth, prefers moist, loamy soil. Good for Christmas trees.
Grape, Riverbank +	<i>Vitis riparia</i>	20-30'	Shade	Found along streams or damp cool woods. Flood tolerant, can climb up to 70 ft.
Hazelnut +	<i>Corylus americana</i>	8-15' / 8-12'	Full/Part	Cold tolerant. Grows best in rich, well-drained soils. Shallow roots.
Juneberry +	<i>Amelanchier alnifolia</i>	8' / 8'	Part	Prefers loamy soils, tolerates sand and clay. Lovely fall colors, white flowers.
Maple, Red	<i>Acer rubrum</i>	50-70' / 60'	Part	Moderate to fast growing. Prefers well-drained soil. Red, yellow in fall.
Maple, Silver	<i>Acer saccharinum</i>	60-90' / 75'	Part	Grows in poor wetter soils, rapid growth rate. Yellow fall color.
Maple, Sugar	<i>Acer saccharum</i>	60-80' / 80'	Any	Slow to moderate growth, best in well-drained loam. Syrup, bright fall colors.
Nannyberry +	<i>Viburnum lentago</i>	15-20' / 6-10'	Part	Well-drained to dry, even moist soils. Mildew growth common if too much shade.
Ninebark	<i>Physocarpus opulifolius</i>	10' / 8'	Part	Medium to fast growing. Good for difficult sites, dry to wet, sandy, loam, or clay.
Oak, Bur	<i>Quercus macrocarpa</i>	70-80' / 80'	Part	Slow growing, likes moist well-drained soil, will grow in other areas.
Oak, Red	<i>Quercus rubra</i>	60-80' / 50'	Part	Fast growing, prefers well-drained rich moist soils.
Oak, White	<i>Quercus alba</i>	60-80'/60-80'	Full/Part	Stately with purple fall leaves, likes deep, acidic, sandy loams.
Pine, Jack	<i>Pinus banksiana</i>	30-80' /20-30'	Full	Needs full sun, fast growing at first, good for pulpwood, poles, and sawlogs.
Pine, Norway (Red)	<i>Pinus resinosa</i>	50-80' / 30'	Full	Moderate/fast growth, likes sandy well-drained soil.
Pine, White	<i>Pinus strobus</i>	80-95' / 80'	Part	Rapid growth rate. Prefers well-drained moist loam, silty loam.
Plum, American +	<i>Prunus Americana</i>	25' / 20'	Full	Loam, sand, gravel well drained, rapid growing.
Spruce, Black	<i>Picea mariana</i>	30-70' /15-30'	Shade	Shortest needle spruce, native to bog areas, moderate growth rate.
Spruce, White	<i>Picea glauca</i>	40-80' / 25'	Any	Rapid growing, plant in well drained med to fine soils, Christmas tree.
Sumac, Staghorn	<i>Rhus hirta</i>	5-15' / 10-15'	Full	Fast growth rate, all soil types, good for bank stabilization.
Tamarack	<i>Larix laricina</i>	50' / 20'	Full	Wide range of soils, wet or dry sites. Yellow fall color; loses needles in winter.
Willow, Peach-Leaf	<i>Salix amygdaloides</i>	25-45' / 30'	Full	Grows in moist, well-drained soils, good for riparian restoration.

* Identified as native to St. Louis County, Minnesota and surrounding area, in Welby Smith's *Trees and Shrubs of Minnesota*, University of Minnesota Press, 2008.

+ Known to produce fruit suitable for wildlife, though the SWCD makes no guarantees what or if plant will produce, appearance or flavor of fruit.

The mission of the South St. Louis Soil and Water Conservation District is to provide technical, educational, and financial resources to land occupiers in order to implement practices and projects that preserve, protect, and enhance water quality and other natural resources.
